Price List for Grafted Nut Trees

Nut-Tree Nurseries are few: Demand is great: Order early while available. The trees listed below are subject to prior sale. Order only varieties and sizes having a number or "X", which indicates the number of trees on hand. TERMS: Cash with order. Prices F.O.B. - Huxley, Iowa. No charge for packing. Be sure to add .02% sales tax on all Iowa orders.

NOTICE:

P.O. STATE

Due to the difficulty in grafting nut trees, there are not a number of parties offering nut trees for sale that are not grafted trees. These are seedling trees, produced by planting nuts from named varieties. Seedling trees will not come true and seldom produce nuts better than the wild ones. They have no right to the named called. Plant only grafted trees and be happy, and not seedling trees and be sorry.

Huxley, Iowa
P L A N T I N G I N S T R U C T I O N S

Purchasers of Nut Trees should be prepared to plant the trees as soon as received. If conditions will not permit planting on arrival, by no means leave them set in the package, but remove from package and at all times avoid exposure of roots to air, wind and sunshine. Sun and wind are very harmful to the roots. Dig a trench and heal in the trees until they can be planted. In planting, dig holes plenty large, so that the roots can be placed in their natural position. Put pulverized top soil in bottom of hole, use peat soil in the bottom if available, as it is fine and will pack well and hold moisture. Avoid leaving air pockets when planting, as this will dry out the soil. Plant the trees one to one-half inches deeper than they were in the nursery and be sure to firm soil well, starting from bottom of hole. A baseball bat is a good tamping tool. Leave soil sloping gently towards tree for a distance of about five feet each way. This will help gather more rain water. Next fill in with plenty of mulch material, such as straw, grass, lawn rakings, cobs, etc. Make this mulch six inches or more deep and out a distance of about five feet each way. If season of planting becomes dry, start watering before trees shown signs of suffering for then it is too late. Do not use a small amount of water each evening. Better to water once a week, but give a good soaking when you do it. Pour the water through the mulch as the depression around the trees will put it where it belongs. A good mulching will usually hold enough moisture, that watering will not be necessary, except in rare cases. Do not use water while planting. If the soil is dry when planting, pour water through mulch afterwards. After trees are planted, wrap each one in newspaper and leave it on until growth starts to prevent drying out before the roots get into action.

Nut trees love lime. While there is not yet any formula worked out as to the amount of ground lime-stone to be used, it has been found where native Black Walnut trees grow and perform well, the soil has lime rockstone beds, showing that lime-stone can hardly be overdone. So lots say for the present mix a good one-half gallon of ground limestone with the soil for each tree when planting, and add more in increased amounts about every two years or so. Nut trees are gross feeders and should be fed for best results with fertilizer. As the lime produces neutral soil, which is favorable to nut trees, a fertilizer containing very little, if any, acid should be used in order to work with the lime and not against it. As far as I know, no one has carried on any experiments to determine the proper amounts to be used. Nitrate of soda (a packing house by-product) is a good fertilizer. Amount to be used depends on the soil needs. Using commercial fertilizer I would estimate about one-fourth pound per inch of tree trunk, annually. Cow manure is the best of barnyard manures.

If you have two trees and only time to plant one right, better plant only the one, and throw the other away than to half-way plant the two and lose both, for one living tree is worth more than two dead. When one considers the length of life of a nut tree and the value of its life's production, it can easily be seen how well the owner can afford to give a little extra time and care in planting.

BERHOW-NURSERIES

HUXLEY - IOWA.

The following shell prints are produced from actual size.
Performance and production is based on conditions here in
central Iowa.

Several varieties should always be planted together
to insure proper pollination

Myers

N-Lat. 40.20 - 29-per-lb.
Disc-1946 - Ohio.

The thinnest shelled as well as the most wanted of
of all varieties. In this section it is one of the youngest
to come into bearing usually in its second year and
is an every year bearer. Late to vegetate and
bloom there by escaping late frosts.
For pollination it blooms with OHIO and THOMAS.
Season about Oct 10 here. a wonderful cracker
of whole halves. Due to thinness of shell huller
must not be set as close as for other varieties
or some nuts will be cracked in hulling.
Score 80.18 Kernel 32.7% - Cracking Score 100% - Quarters-87%
Should be included in every planting group, within
its planting range.

OHIO

N-Lat. 41.00 - 33-per-lb
Disc- 1915 - Ohio

Here is the youngest black walnut variety to
come into bearing that I have yet fruited. very seldom
passes the second season before starting to bear.
A very good bearer. produces a heavy crop every
year regardless of others with a total failure
will crack out more large kernels than most
varieties. No harder variety grows. Season
here about Oct 5. Blooms right for pollination for
Myers and Thomas. Score 79.94 - Kernel 29.34%
cracking-score 95. has proven adaptable over
a wide range. A good one for the north.

Horton

N-Lat. 42.40 - 19-per-lb.
Disc-1932 - Iowa.

A Large square shouldered nut, C.A. Reed said an
excellent nut. another splendid cracker of plump
bright kernels. Heavy and Light bearer on
alternate years. 1st degree in hardiness. Season
here about Sept 25. Score 81.92 - Kernel 30.44%
Cracking Score 91.77 - Quarters-91.80%
1st degree in hardiness. Should do well in the
north.

Cochrane

N-Lat. 44.05 - 28-per-lb.
Disc- 1940 - Wis.

Cochrane a seedling from Huber, and is of the
farthest north origin of all - certainly should do
well in northern sections. Here is a nut that
looks exceptionally good. Have not yet fruited it here.
Has unusual smooth inner shell. When tested by
MacDaniels he stated that this variety yielded more
halves than any variety he had tested in some
time. a variety that should be included in every
planting. score 96. - Kernel 32.7% - Cracking
score-96.09 - Quarters 97.7%

BERHOW NURSERIES
Huxley, Iowa

Dear Sir:

In response to your valued inquiry for Grafted Nut Trees, I am enclosing my Price List and other information regarding these trees.

Grafted Black Walnut trees are among our fastest growers, as well as the youngest to come into bearing among edible tree crops. Many varieties start to bear as early as the second and third year after planting and it is always best to plant several varieties for good pollination. These trees are among our hardiest trees and are adaptable to a very wide range. I am often asked which varieties are the best, but this is a hard question to answer as we do not all have the same opinion. Study the record sheet and make your selection. They are all good or they would not have been approved and named.

These named improved varieties have been discovered by different people in different parts of the United States and have proved to have outstanding merits as compared with our native or wild ones. They are young bearing, excellent crackers, having high kernel percentage with sweet and light colored kernels of superior quality. They are also among our longest lived trees. They produce an annual crop of one of man's best foods, sealed in a tight package that never spoils and with never a worm in the nuts.

Value of nut meats in the diet as given by Dr. John Harvey Kellogg, of Battle Creek, Michigan are as follows: 1# of Black Walnut meats is equal to 4# of Beef; 6½# Beef Ribs; 5½ Veal; 4½# Mutton; 3# Ham; 10 Chicken Broilers; 13½# Oysters; 5# Eggs and 9½# Milk.

My Nut Trees are propagated, sold, carefully hand dug, and packed for shipment by myself. They have a strong root system, and have proved to transplant very satisfactorily. I am very particular in obtaining my graft wood, to be sure they are true to name.

Nut Tree Nurseries are few and the demand for trees is growing by leaps and bounds, and in the past I have shipped Nut Trees to all parts of the United States, without ONE complaint, but considerable repeat orders and complimentary letters, as shown on the reverse side. My suggestion is that if you are in the market for Nut Trees, get your order booked as soon as possible while the varieties and sizes are still to be had. Later you will have less to choose from, as well as completely sold out, resulting in one year's time lost, which will never return.

Yours very truly,

BERHOW NURSERIES

COMPLIMENTARY
LETTERS

Berhow Nurseries
Huxley, Iowa

April 24, 1944

Dear Sir:

I received the nut trees in first class condition, and they are fine. You furnish much better root system on nut trees than I have seen anywhere else. I expect to order more this fall.

Very truly yours,
G. W. Naderman - - Washington

Mr. S. Berhow
Berhow Nurseries
Huxley, Iowa

January 31, 1944

Sirs:

I have purchased about 24 nut trees the past three years and from the appearance of your stock would say these trees are the best of the lot. I am more than pleased with them. Thank you for your courtesy and consideration.

Yours truly
Alfred L. Barlow - - Michigan

Berhow Nurseries
Huxley, Iowa

May 8, 1944

Dear Sir:

I wish to thank you for the nice nut trees you sent, also the care with which they were dug. There were no broken roots.

Yours truly,
Dan Edelman - - Kansas

Berhow Nurseries
Huxley, Iowa

May 2, 1944

Dear Mr. Berhow

I want to thank you for the fine stock and the good packing. I am sure I will have a 100% stand this fall.

Yours truly,
Wm. L. Kling - Northern Idaho

Berhow Nurseries
Huxley, Iowa

February 24, 1945

Dear Sir:

The two Black Walnut trees I received from you last spring, arrived in fine shape, and made a fine growth.

Truly yours,
Harry Engstrom - - Minn.
